

Nagulapati Akshitha Reddy

akshithareddy132@gmail.com +91 6301108114 Hyderabad

Professional Summary

Computer Science and Engineering graduate with strong programming skills in Java and Python and a solid foundation in software engineering, databases, and web technologies. Experienced in building software applications through academic projects and committed to developing efficient, scalable, and user-focused solutions in a collaborative environment.

Education

Koneru Lakshmaiah University	Jul 2022 – May 2026
B.Tech in Computer Science and Engineering	CGPA: 9.54/10
NTR Junior College	2020 – 2022
Intermediate Education	
NTR Model School	2019 – 2020
Secondary Education	

Skills

Programming Languages: Java, Python

Web Technologies: HTML, CSS, JavaScript

Database Technologies: MySQL

Development Tools: Git, GitHub, VS Code

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems, Operating Systems, Computer Networks, Software Engineering

Software Development: SDLC, Agile Methodologies, Software Testing, Debugging, Version Control

Cloud Technologies: AWS (EC2, IAM, S3)

Artificial Intelligence: Generative AI, Prompt Engineering

Cybersecurity: Linux, SSH, Log Analysis, Authentication, Network Security Fundamentals

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication Skills, Adaptability, Quick Learning

Projects

Inventory Management System

- Developed a Java-based Inventory Management System to manage product inventory, suppliers, and stock records.
- Implemented CRUD operations using Java, JDBC, and MySQL for efficient inventory management.
- Designed a relational database with optimized SQL queries for improved data retrieval and storage.
- Integrated low-stock alerts, product search, and inventory update functionalities.
- Applied Object-Oriented Programming principles and exception handling to develop a reliable application.

Emotion-Based Music Player

- Developed an AI-powered music recommendation system using Python, Flask, OpenCV, and DeepFace.
- Implemented facial emotion recognition to recommend music based on users' emotions.
- Built a responsive web application using HTML, CSS, JavaScript, and Flask.
- Integrated the emotion detection module with the frontend to automate music recommendations.
- Performed functional testing and optimized application performance for improved user experience.

SSH Sentinel – Real-Time SSH Attack Detection System

- Developed a Python-based log analysis engine to detect SSH brute-force attacks by parsing Linux authentication logs.
- Processed hundreds of login events to identify repeated failed login attempts and suspicious IP address patterns.
- Integrated IP geolocation enrichment and automated CSV reporting for attack analysis and security monitoring.
- Built an interactive Flask dashboard to visualize attacker origins, login trends, and attack statistics.
- Improved server security by enforcing SSH key-based authentication and disabling password-based logins.

Certifications

- AWS Certified Cloud Practitioner
- Red Hat Certified Enterprise Application Developer
